

Blender guide til Erlinord

Programmer:

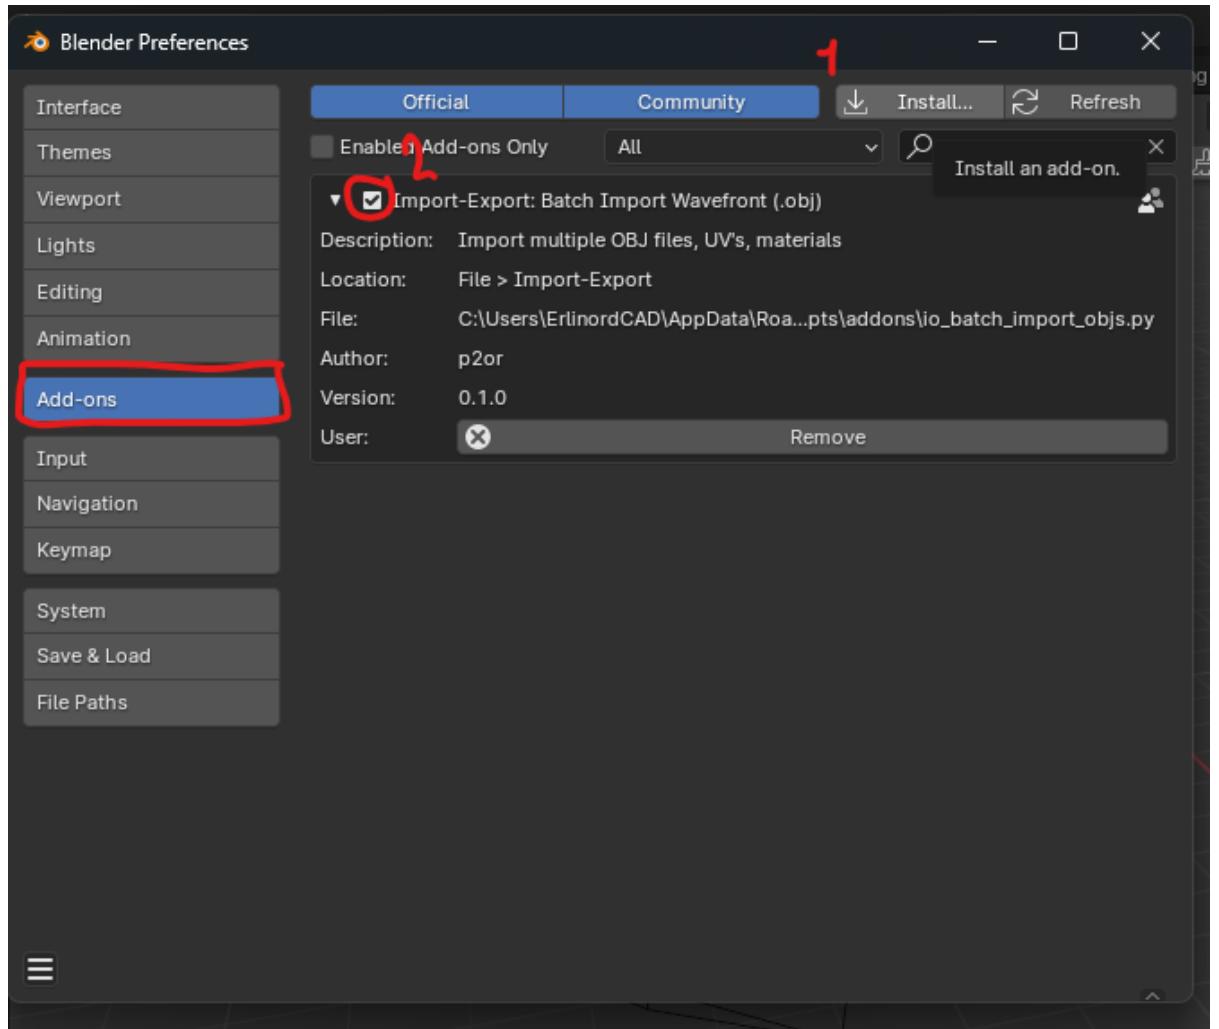

- [Blender](#)
- [BlenderKit](#)
- [Batch import af OBJ](#)
- [Delete Material Duplicates](#)

Batch import af .obj:

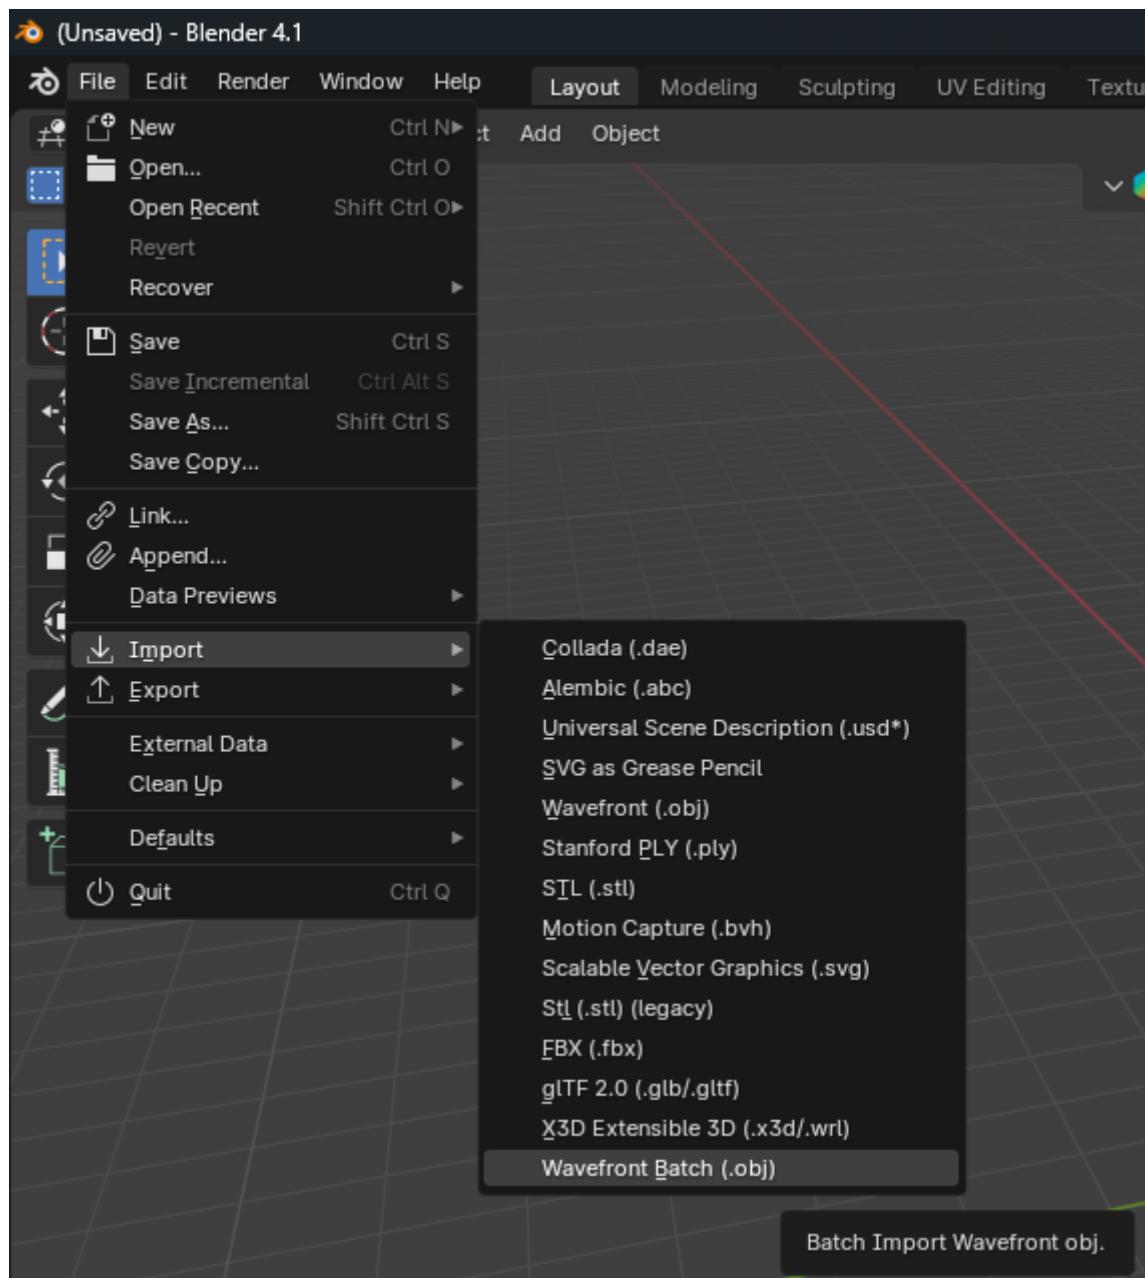

- Installer [io_batch_import_objs.py](#) ved at;
 - Blender > Edit > Preferences

- Add-ons > Install > Åben [io_batch_import_objs.py](#) > Aktiver (2)

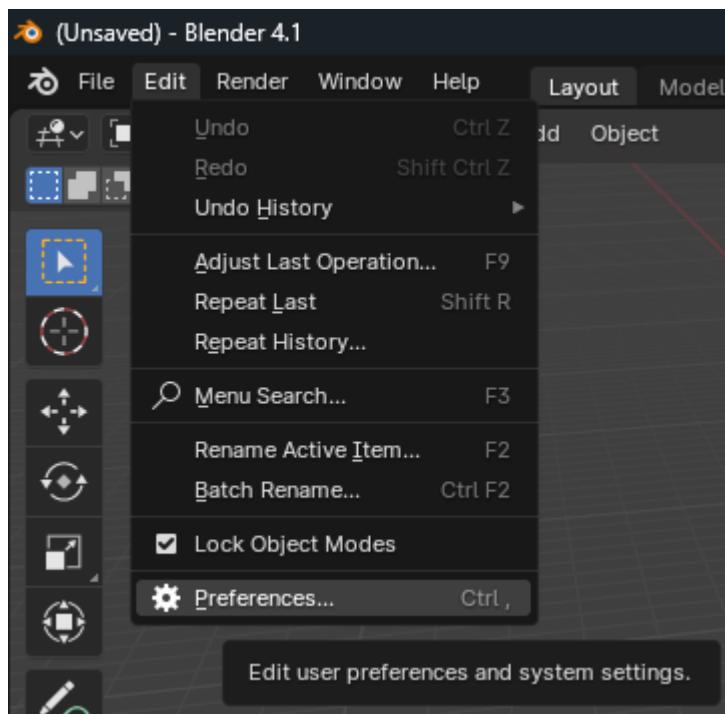

- File > Import > Wavefront Batch

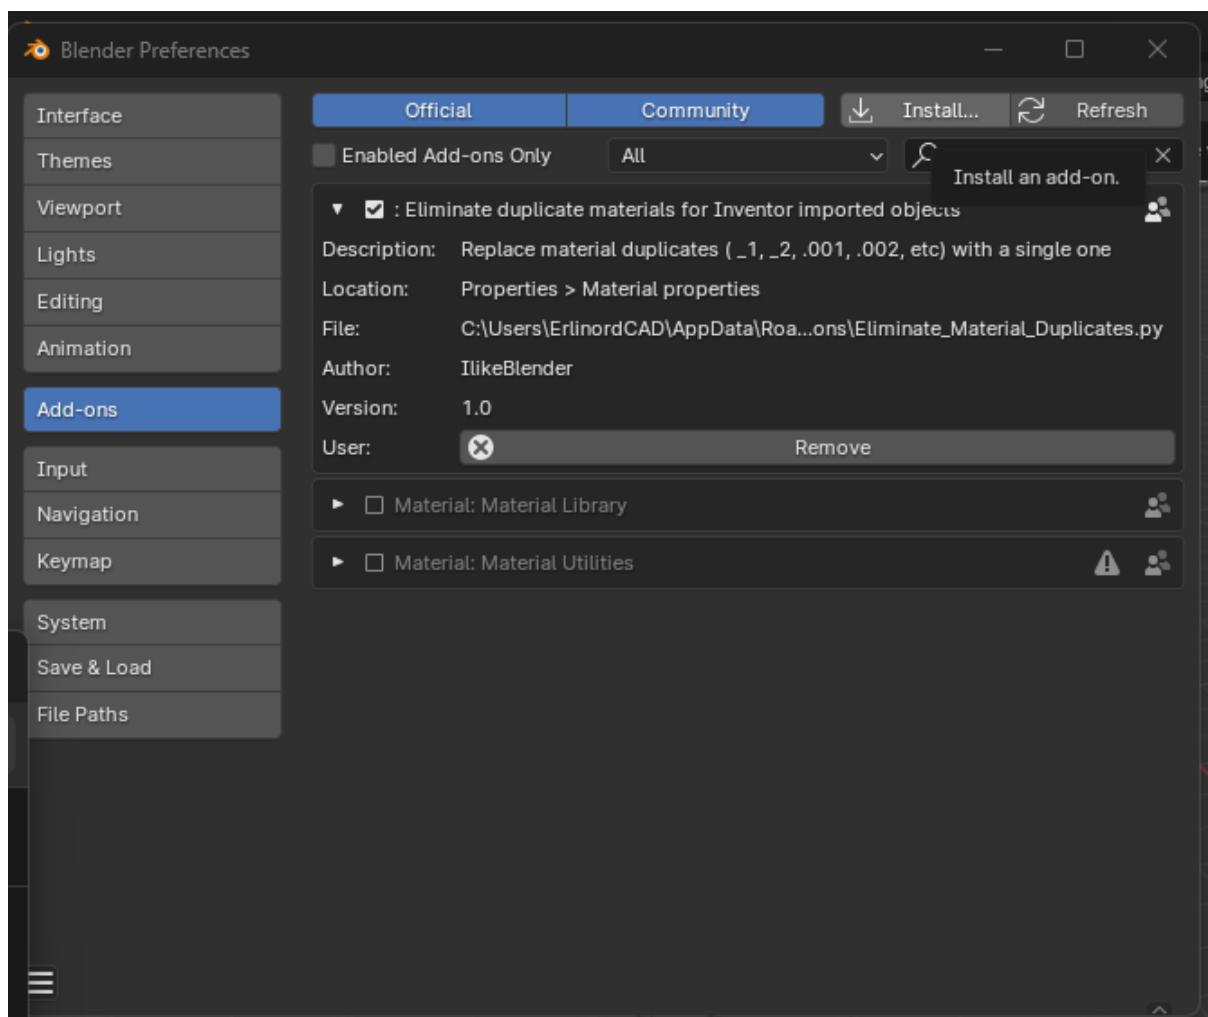

Slet alle dupletter af materiale:

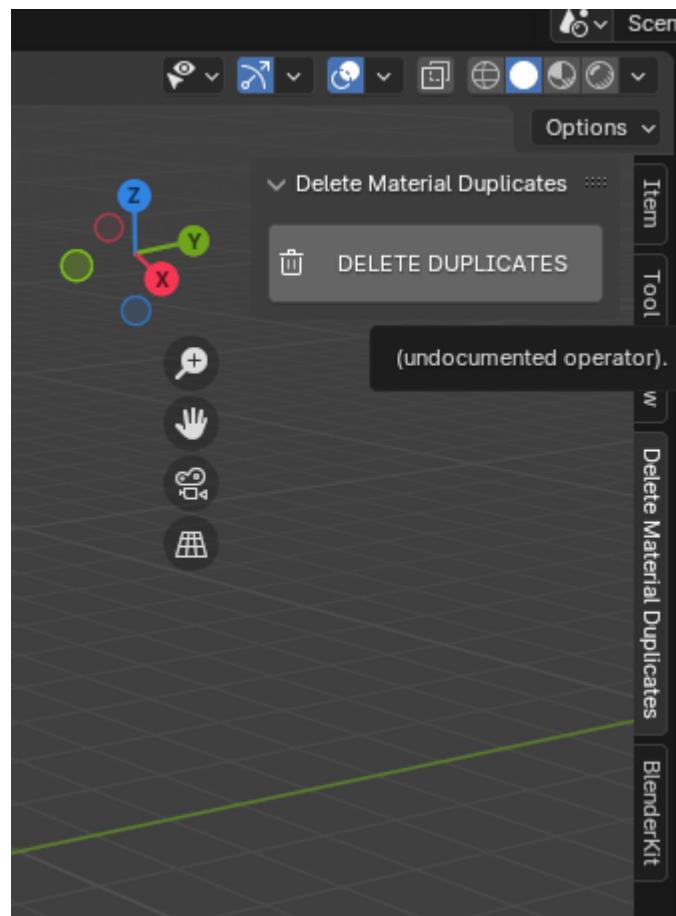

- Installer `Eliminate_Material_Duplicates.py` ved at:
 - Blender > Edit > Preferences

- Add-ons > Install > Åben [io_batch_import_objs.py](#) > Aktiver (2)

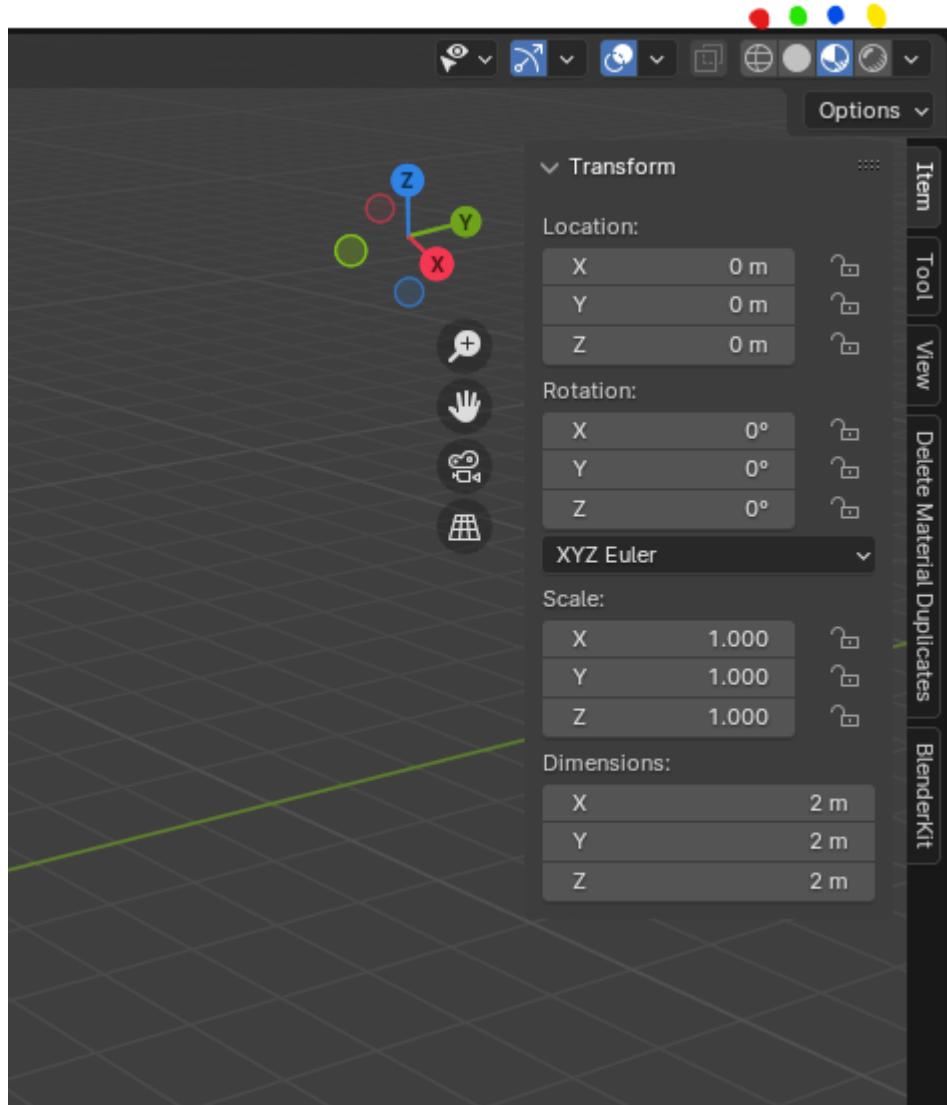

- Bruges ved at vælge alle parter (genvej: [a](#))

BlenderKit

Følg vejledningen på <https://www.blenderkit.com/>

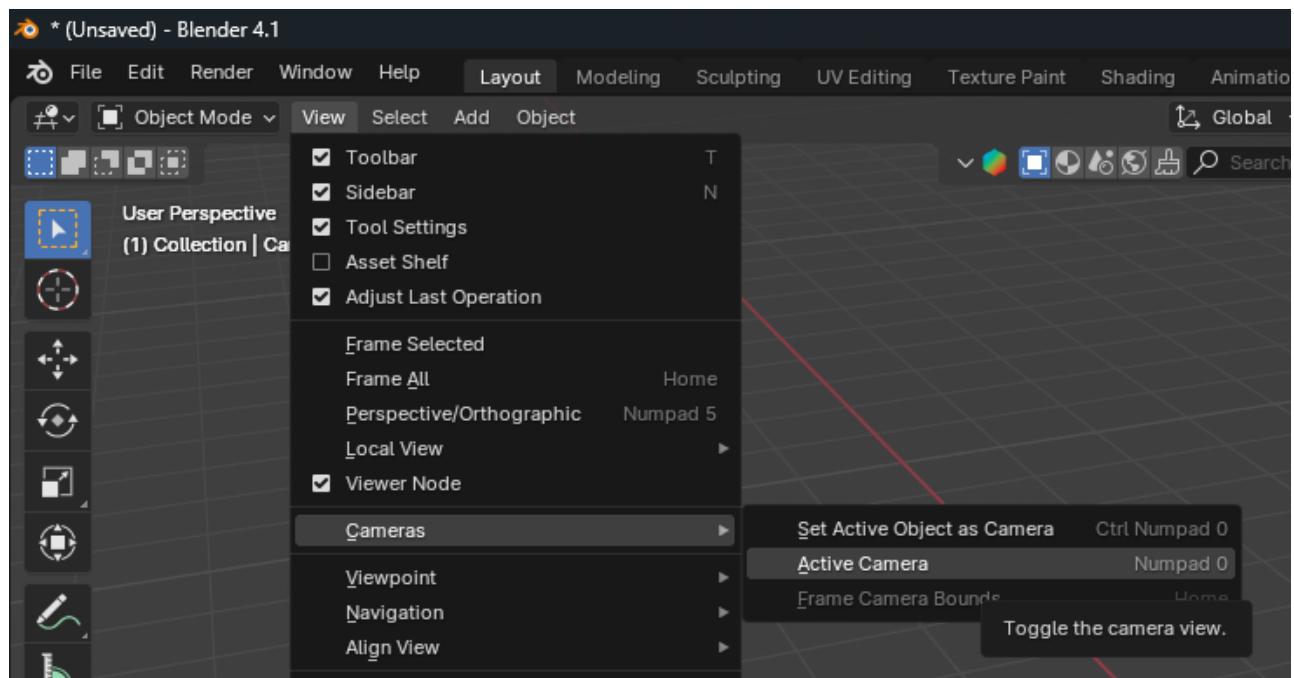

Renderinger

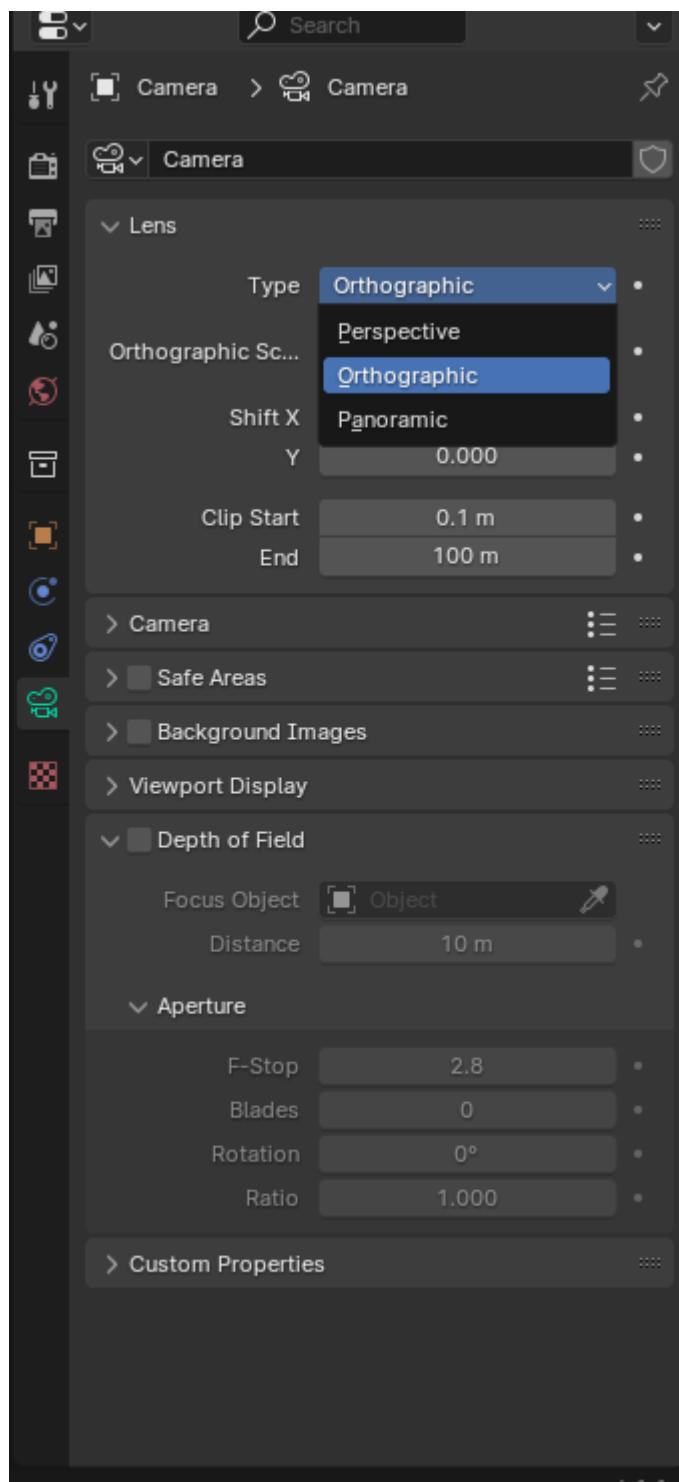

- **Rød** viser 'Wireframe'
 - **Grøn** viser 'Viewport'
 - **Blå** er 'Materiale Preview'
 - **Gul** aktiverer 'Render view'

Kamera'er

- Marker kameraet, og tryk numpad 0

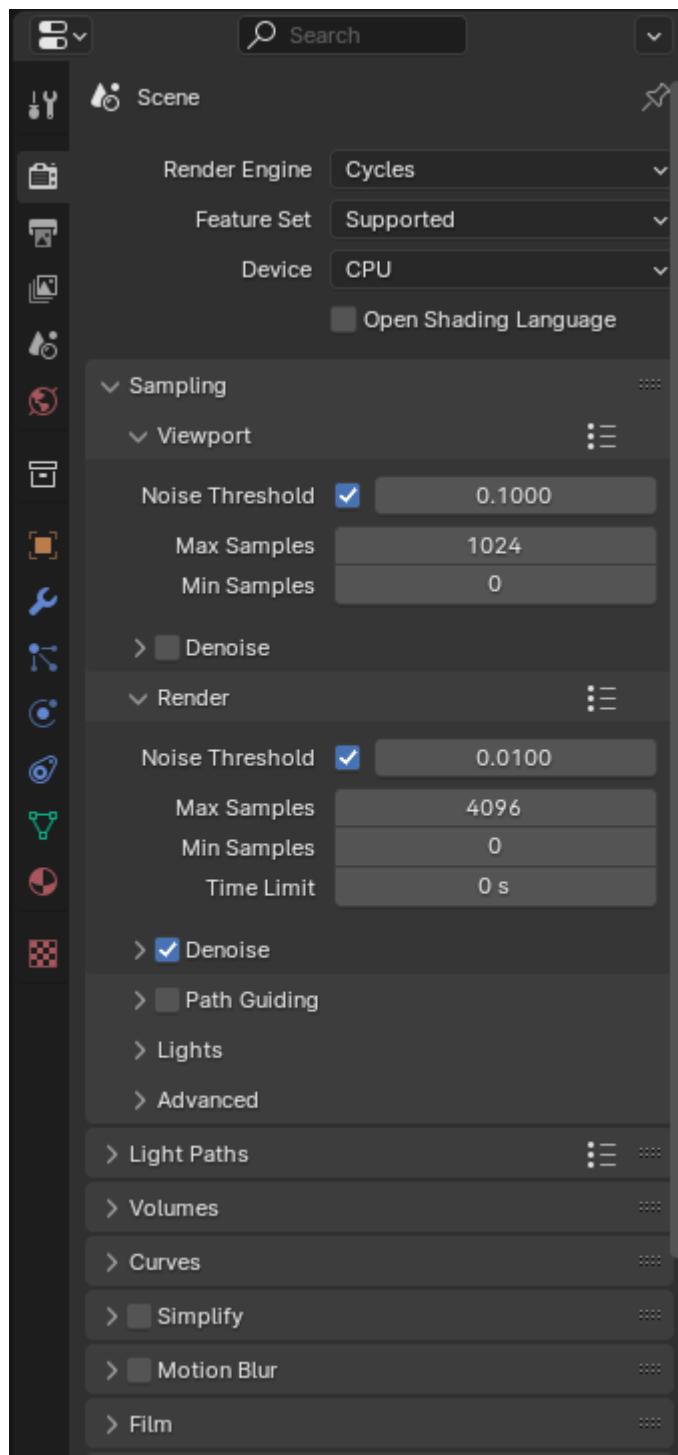

- Kan derefter indstilles til Perspective eller Orthographic

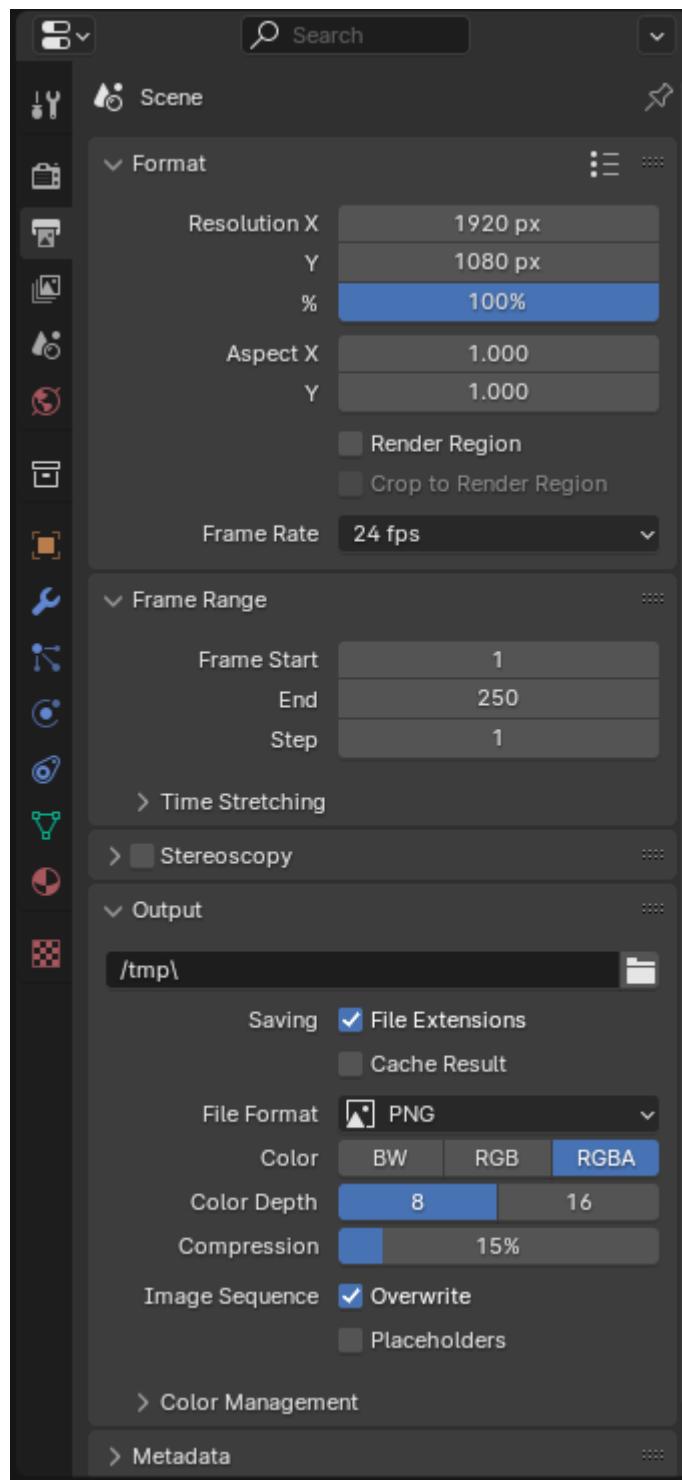

Indstillinger til Renderinger:

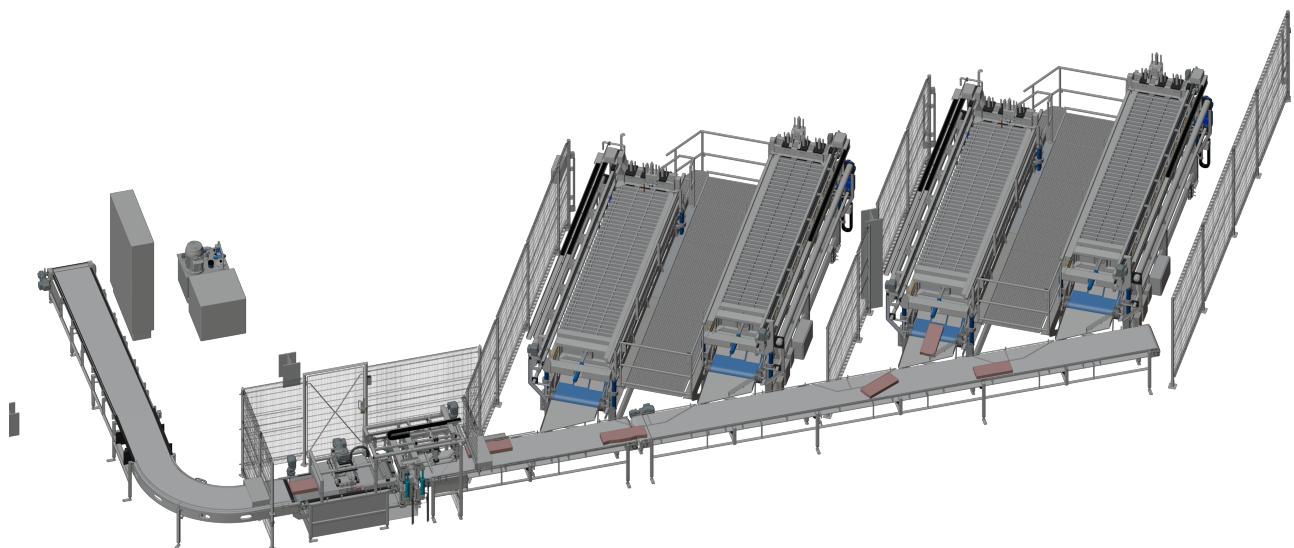

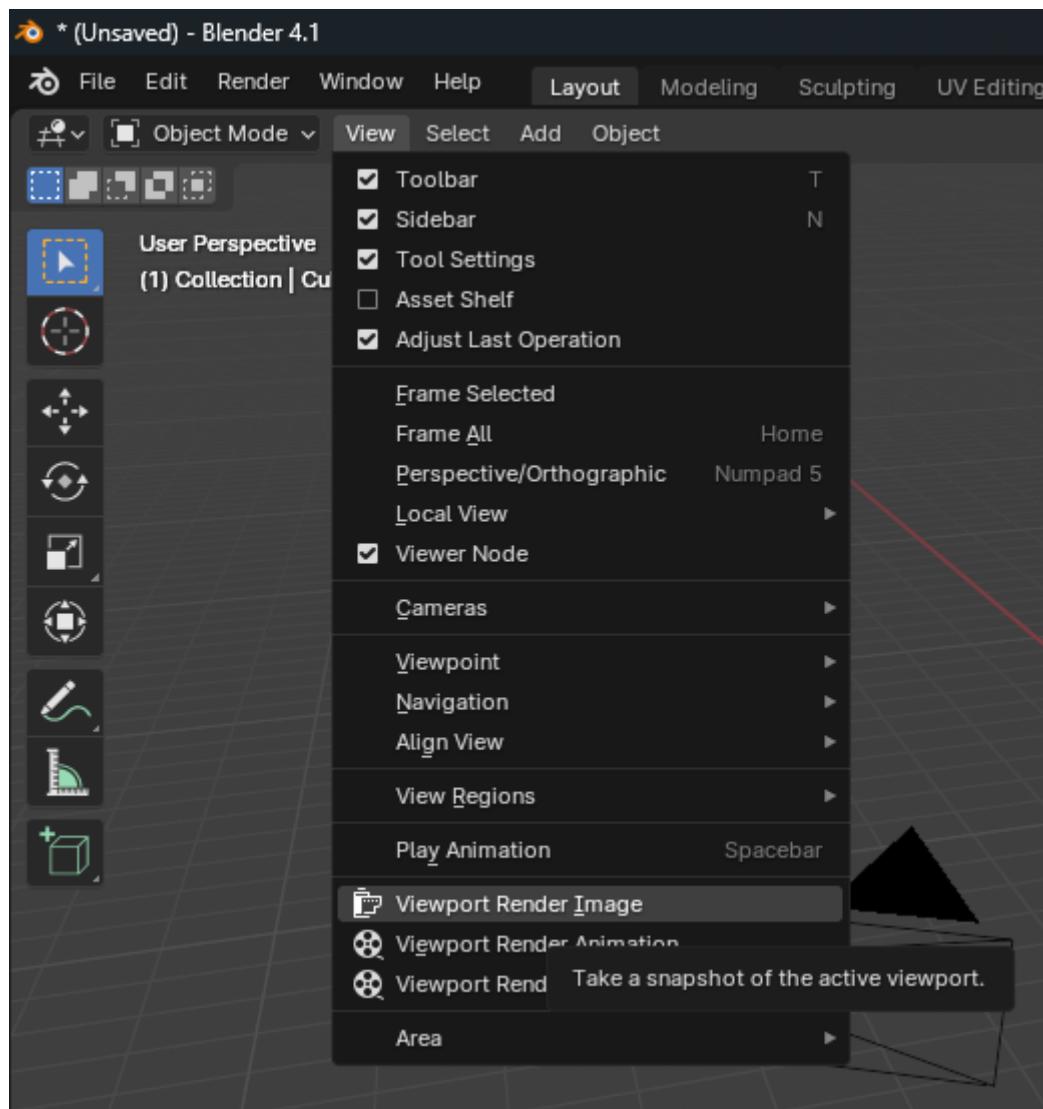

- Brug **Cycles**, den er bedst.

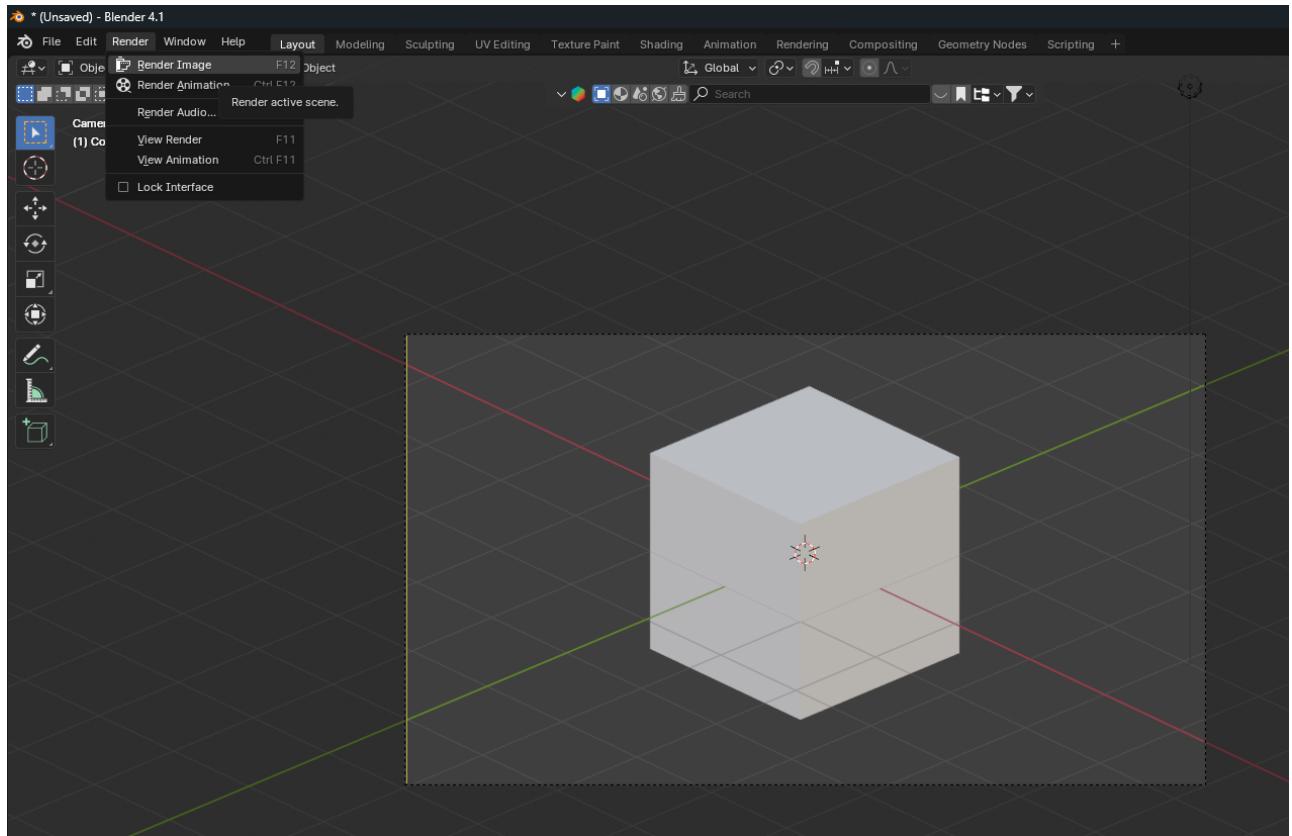

- Indstillinger til output

- **Viewport Render Image** giver billeder som nedenfor

- For lave renderinger, som benytter materiale og tager godt med tid. **Render > Render Image**. Brug **alt + s** for at gemme billeder i Renderings vinduet.

Alt findes som videoer på youtube, og google er din ven. Husk at download nok RAM.
